Lower-friction funnel

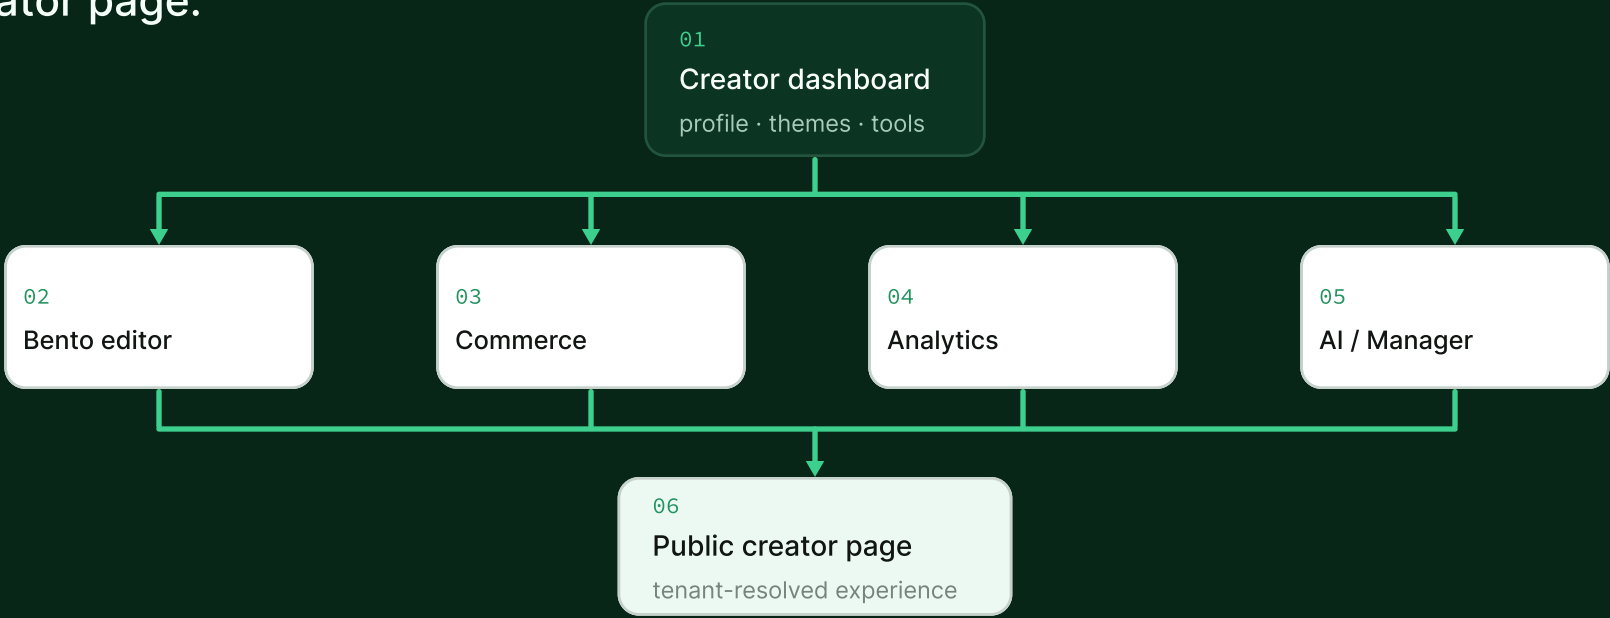

ENGINEERING NARRATIVE

Built one creator destination across publishing, commerce, analytics, AI, and brand operations.

Co-founded Pocketlink and owned core product engineering: the bento editor, responsive page model, multi-tenant publishing, custom-domain lifecycle, commerce, behavioral analytics, AI tooling, email workflows, and production infrastructure.

PLATFORM SYSTEM LANDSCAPE

Creator dashboard branches into four product systems, then reunifies in the public creator page.

ENGINEERING SCOPE

Publishing

Multi-tenancy

Commerce

Analytics

AI intelligence

Cloud delivery

CORE TECHNOLOGIES

Next.js 15 · React 19 · React Grid Layout · Supabase · PostHog · Cloudflare

Gemini 2.5 Flash · AWS S3/Lambda/Route 53/CloudWatch · Docker · GitHub Actions · Kubernetes · Azure AKS

Product Problem & Ownership

One creator-owned destination for publishing, monetization, intelligence, and brand work.

PRODUCT GOALS

GOAL 01

Position creators effectively

Customizable profile/page publishing gave creators a richer owned destination than a fixed link list.

GOAL 02

Help creators monetize

Products, subscriptions, digital downloads, optimized checkout, and brand collaborations lived in the same product.

GOAL 03

Operational intelligence

Analytics, heatmaps, AI business analysis, and automated collaboration management turned page activity into decisions.

OWNERSHIP LEDGER

BUILT	Bento editor + page/card model responsive desktop/mobile composition	BUILT	Autosave + undo/redo 2.5 s save cadence · 10 snapshots
BUILT	Nested cards / nested pages deeper creator content paths	ENGINEERED	Multi-tenant public routing Pocketlink subdomains + custom domains
ENGINEERED	Cloudflare domain + SSL lifecycle 15-second status polling · TLS 1.2+	BUILT	Analytics + heatmaps 30+ visitor/behavior signals
BUILT	Creator commerce products · inventory · checkout · orders	BUILT	AI, email + platform integrations BI agent · manager · campaigns · infra

MY ROLE

Co-founder and hands-on product/engineering owner

Owned core creator publishing, editor state and page architecture, multi-tenancy and domains, commerce, analytics, AI tooling, email workflows, integrations, deployment, storage, and operational infrastructure.

PRODUCT SURFACE

PUBLISHING

Creator destination
profile · bento editor · themes · nested pages

MONETIZATION

Commerce + subscriptions
products · checkout · gated downloads

INTELLIGENCE

Behavior + AI
analytics · heatmaps · Gemini BI agent

OPERATIONS

Creator business tooling
email · social · domains · integrations

Editor & Publishing Architecture

Responsive bento composition, persisted page state, autosave, nested pages, and hybrid public rendering.

2 → 12

grid mapping

mobile columns → desktop

2.5 s

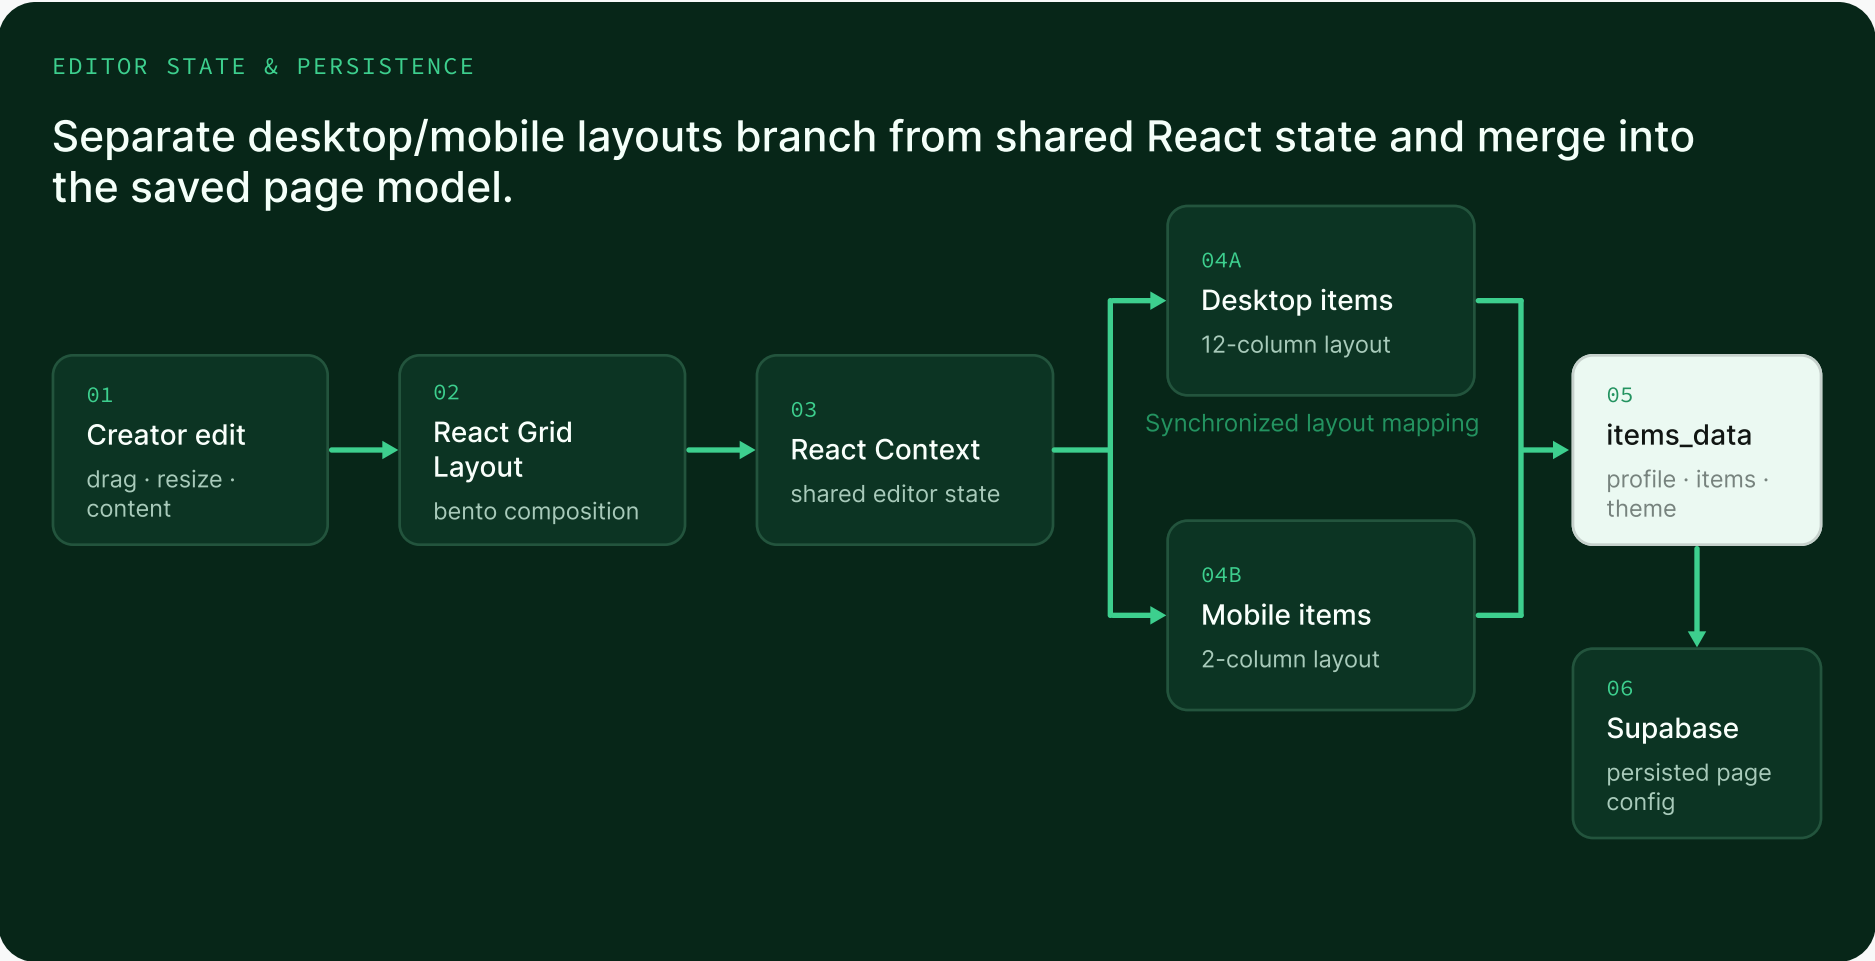

autosave cadence

save window

10

history snapshots

bounded undo/redo

AUTOSAVE

Save without a publish step

Creator action → React state → unsaved → 2.5-second save window → Supabase update → saved state.

UNDO / REDO

Bounded snapshot history

Changes grouped on a 250 ms timer; up to 10 desktop/mobile snapshots; new edits after undo remove future redo history.

PUBLIC RENDERING

Hybrid server + client path

Server resolves tenant data, metadata, shell and profile; client hydrates the responsive grid/cards and interaction layer.

Public page consumed the saved page configuration directly, so creator edits flowed into the public experience without a separate publish snapshot.

Multi-Tenancy, Domains & Commerce

Hostname-based creator routing, Cloudflare domain lifecycle, and a three-click purchase path.

15 s

domain / SSL polling

provider status cadence

TLS 1.2+

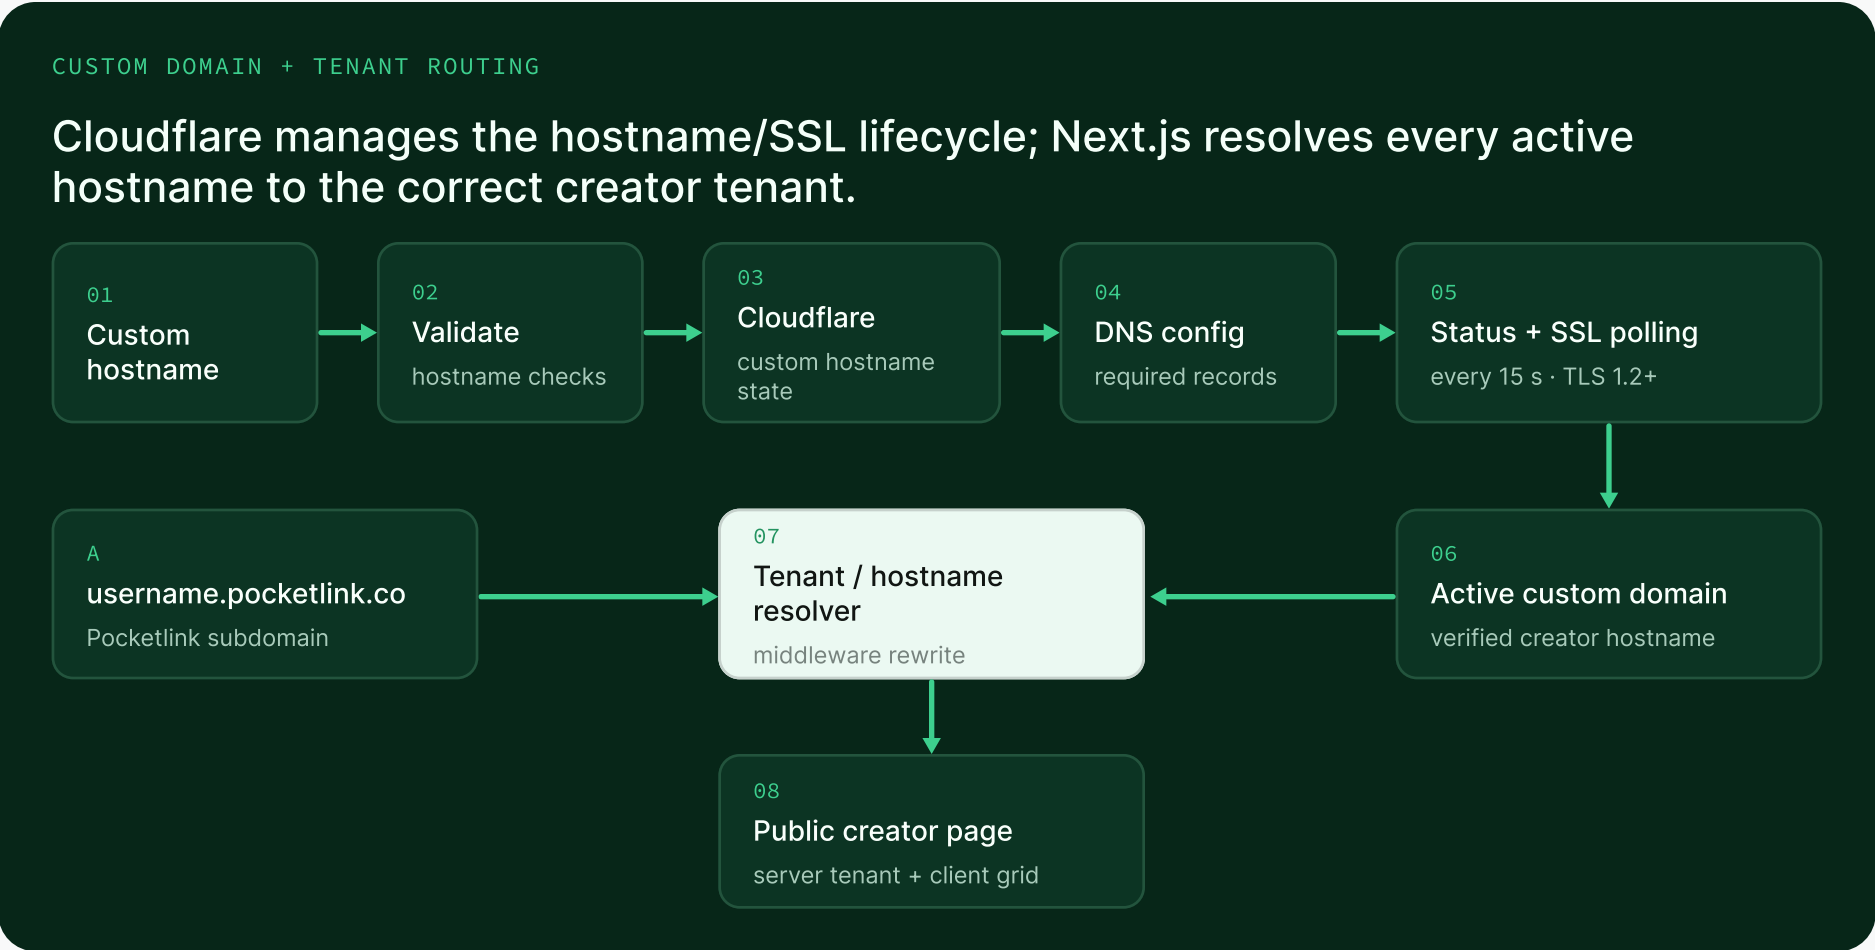

minimum enforced

TLS 1.3 supported

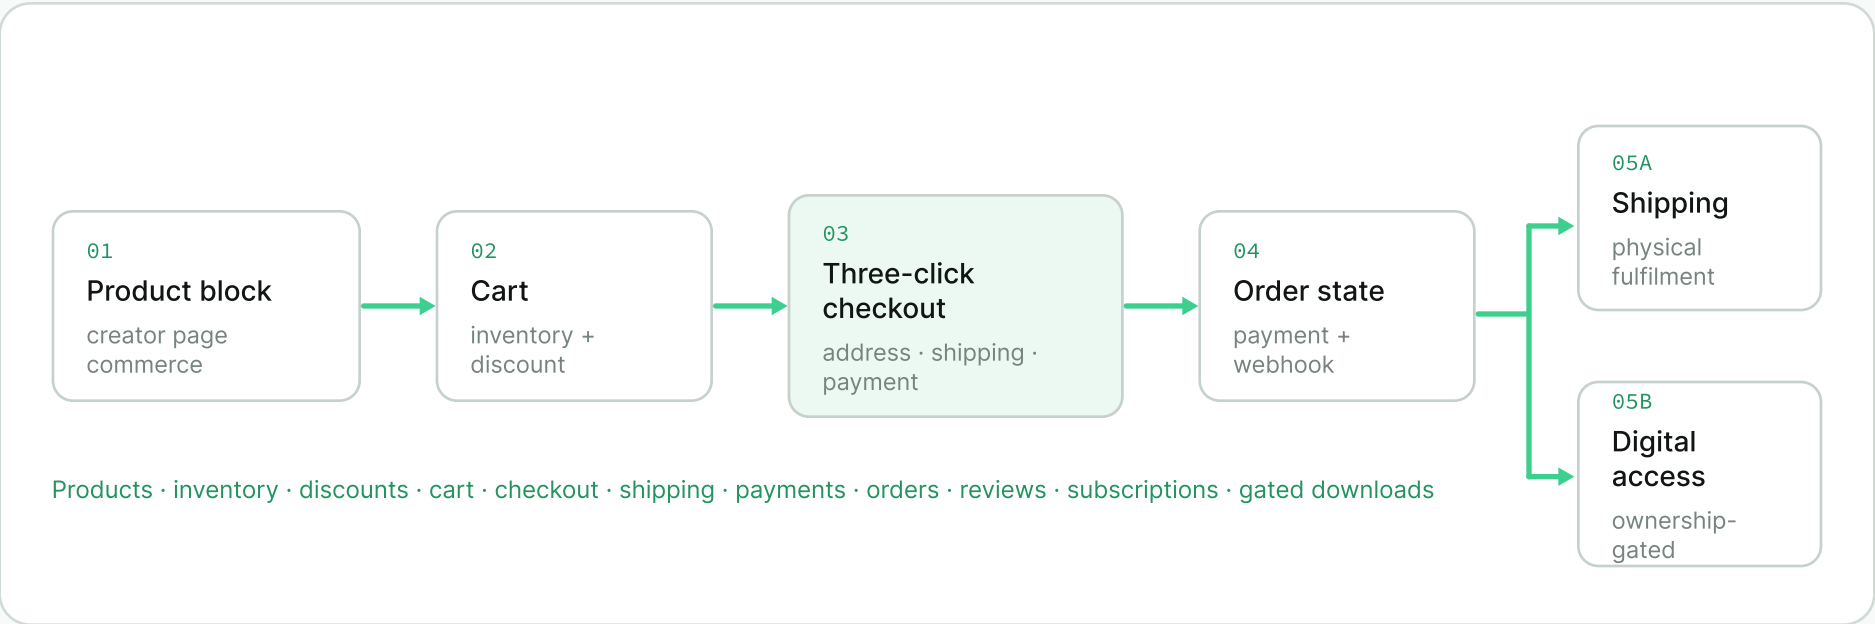

3 clicks

checkout path

reduced purchase friction

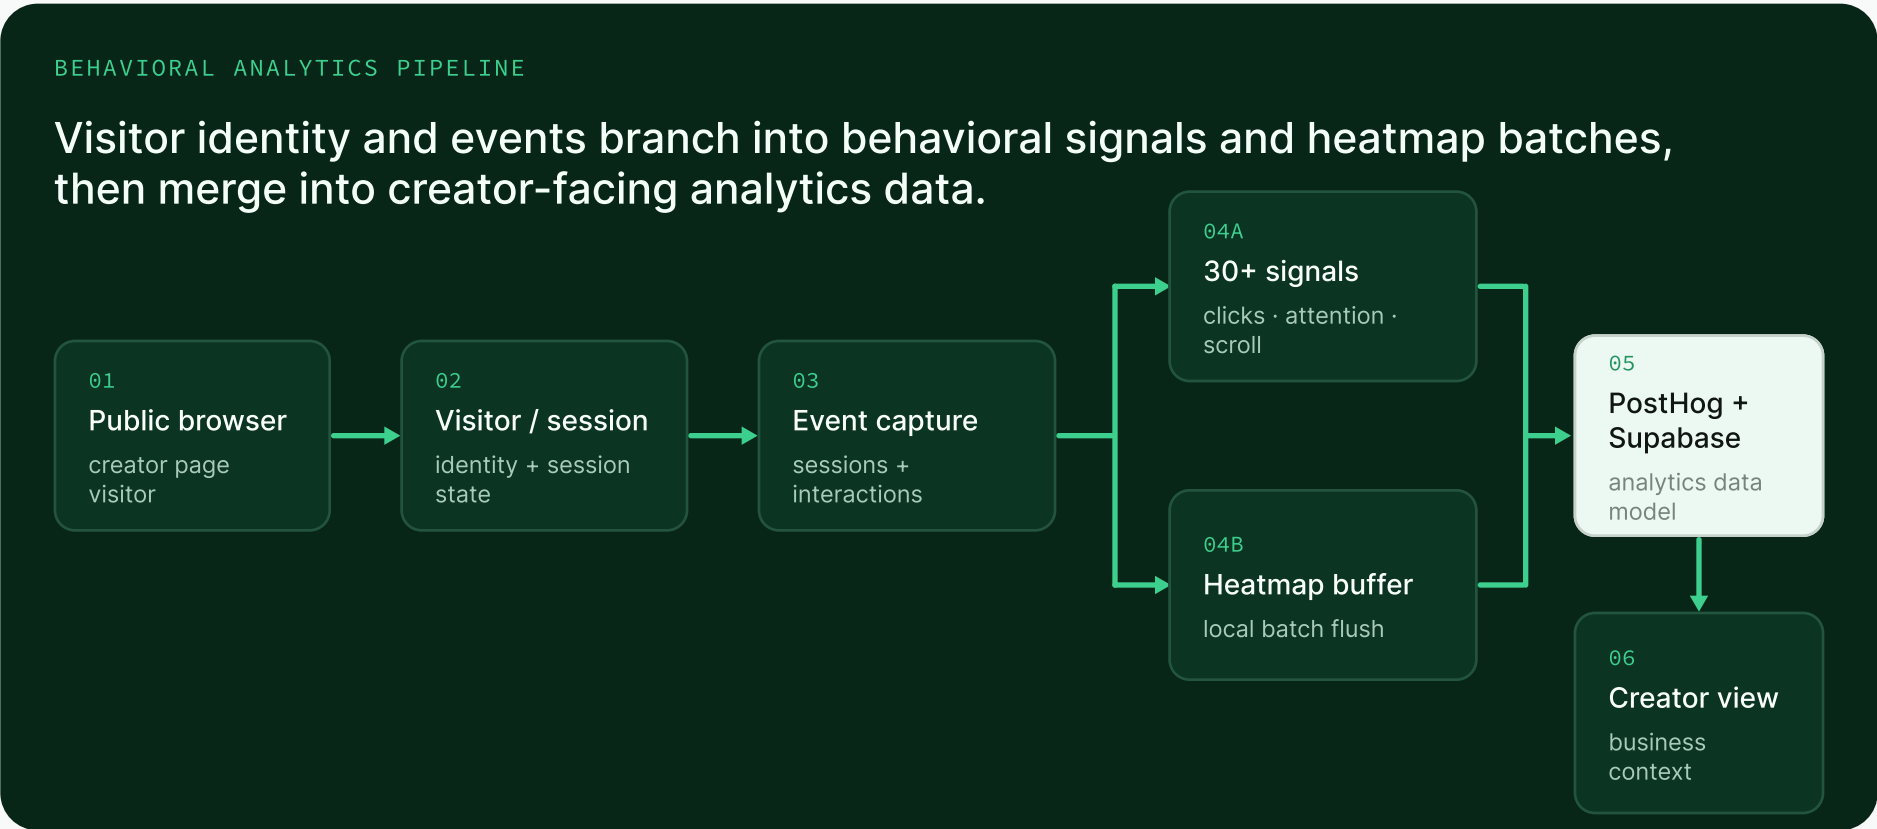

COMMERCE PATH

Analytics, AI & Audience Operations

Behavioral telemetry, creator intelligence, collaboration management, and audience workflows.

AI OPERATIONS

GEMINI 2.5 FLASH

Creator business intelligence

Natural-language answers over Pocketlink commerce and analytics data: sales, inventory, product movement, churn/ conversion diagnosis, behavioral explanations, and predictive stock estimation.

AI CREATOR MANAGER

Brand collaboration operations

Evaluated creator-product fit and downside to positioning/ audience, negotiated collaboration terms, drove opportunities toward agreement, and closed acceptable deals.

AUDIENCE OPERATIONS

EMAIL MARKETING

Audience communication inside the creator platform

Contact lists, templates, drafts, personalization, immediate and scheduled sends, unsubscribe handling, Gmail API and Nodemailer delivery paths, plus outbox-style records for queued processing.

INTEGRATIONS

Creator-facing data surfaces

YouTube · Instagram · Facebook · Gmail · Maps · image/product/OG tooling

AI PAGE TOOLING

Layout assistance

generation · onboarding generation · optimization · builder workflows

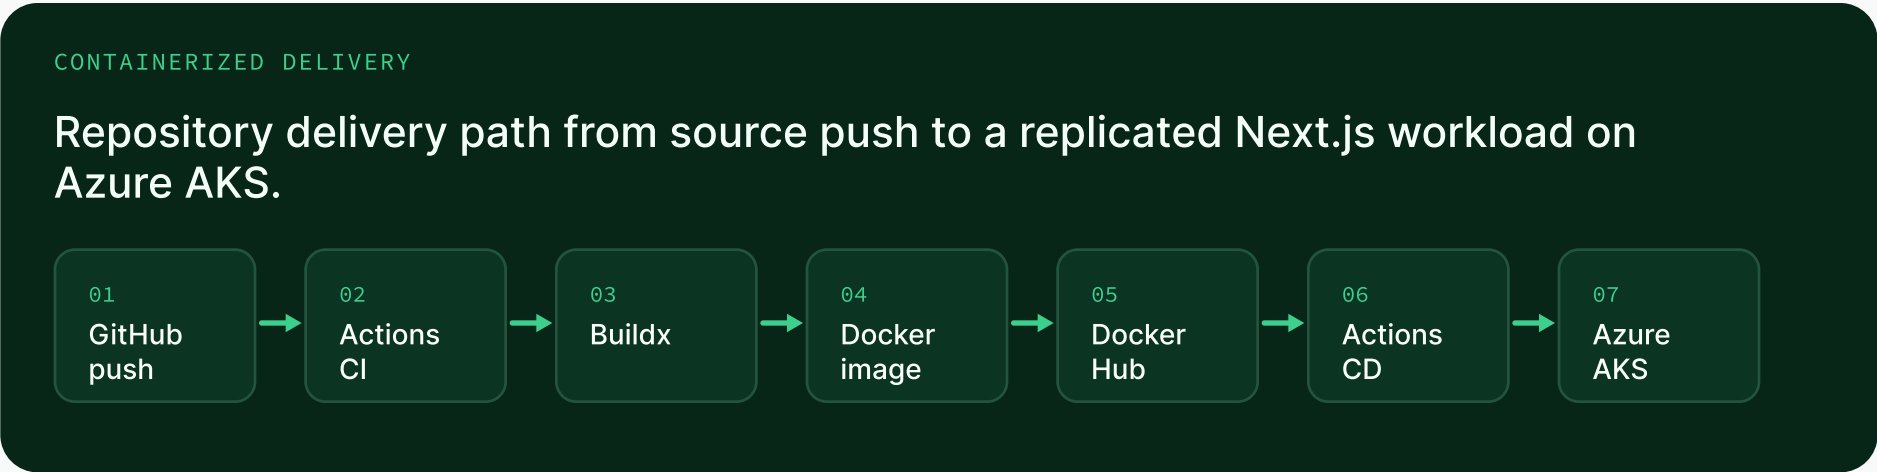

Delivery, Results & Engineering Lessons

Production infrastructure, confirmed scale, architecture decisions, and lessons from a 24,000+ user platform.

CONFIRMED SCALE & PRODUCTION FACTS

SYSTEM	CONFIRMED RESULT	FRAMING
Product scale	24,000+ users in 14 months	Confirmed headline fact
Creator analytics	30+ visitor / behavior signals	Includes heatmaps
Custom domains	15-second domain / SSL polling	TLS 1.2+ enforced
Commerce	Three-click checkout path	Lower-friction checkout path

DELIVERY PATH

ARCHITECTURE DECISIONS

EDITOR MODEL Separate responsive arrays 2-column mobile → 12-column desktop synchronization	TENANCY Host-based public routing one shared route tree for Pocketlink and custom domains
INTEGRATION BOUNDARY Browser + route-handler split direct Supabase for core state; server routes for providers/secrets/orchestration	PUBLIC RENDERING Hybrid server / client model server tenant + metadata; client interactive grid and cards

ENGINEERING LESSONS

LESSON Composable page model card-oriented schema across publishing + commerce	LESSON Domains as product infrastructure tenant routing + DNS + SSL lifecycle	LESSON Intelligence near operations analytics + commerce context + AI action
